

PIT MAGIC®

Pit & Lagoon Treatment

- Reduce ammonia, hydrogen sulfide, and methane
- Improve Air Quality
- Reduce Pathogen Loading
- Reduce composting time for carcasses
- Reduce mortality
- Break down solids

Pit Magic is composed of a unique micro-nutrient enriched carrier to provide accelerated germination, growth, and superior enzyme production while reducing odor, BOD, COD, suspended solids, turbidity, and ammonia concentrations. Stable bacteria spores enhance shelf life and guarantee microbial concentration. Spore-form allows it to resist chlorine, disinfectants and high temperatures.

Net Wt. 25 lbs.

PIT MAGIC®

Pit & Lagoon Treatment

PIT MAGIC is a natural supplement for problem pits, lagoons, and shallow pull-plug gutters to eliminate top crusting, bottom solids, bridging and channeling. Acclaimed "fix-it" for feed spills.

PIT MAGIC liquifies multi-million liter open lagoons within weeks and reduces agitation time and expenses.

PIT MAGIC eliminates clogged shallow pull plug flush gutters to improve flow beyond design expectation.

PIT MAGIC eliminates crusted manure in under-slat pits for beef, dairy, sheep, calf and swine barns for easy flow and reduced wear on agitation and pump equipment.

PIT MAGIC provides additional benefits including odor control, crust and bottom sludge management, manure nutrient value enhancement, and increased nitrogen availability by up to 20%.

This product utilizes the powerful waste digestion abilities of special bacteria and natural enzymes. It is a blend of bacteria strains cultured for their ability to digest organic waste quickly, efficiently and without odors. These strains will work both in the presence of oxygen as well as in the absence of oxygen. The natural enzymes quickly break down proteins, starch, carbohydrates, vegetable fats & oils, and paper for the most effective waste digestion.

APPLICATION RATE for pits and lagoons:

1 lb. of Pit Magic per 30,000 gallons

Application Rate for pull plug systems:

1 lb. of Pit Magic per 1,000 cubic ft.

How to figure cubic feet of your pit or lagoon:

Length x Width x Height = Cubic ft.

Pit or lagoon volume: Estimate 7.48 gallons per Cubic ft.

NFRA RATINGS:

Health: 0; Flammability: 0; Reactivity: 0

Contains/CAS Number

Calcium Carbonate/471-34-1

Visible Bacteria Culture/None
